PC22.25.03 Planning Appeals – NE/21/01785/FUL - 19 West Street, PE8 4EJ –
Replacement of existing wooden single glazed windows (partly rotten), with UPV double glazed units of almost identical woodgrain finish and design (Retrospective).

OTC Previous Comments:

Oundle Town Council objects to the application.

The building is a seventeenth century grade 2 listed building in the conservation area. The applicant should not have undertaken any work on the property without first applying for and obtaining consent and could and should have sought advice from the conservation officer even before submitting an application. If the application had not been made retrospectively the council would have objected unless satisfied that replacement of each window was necessary taking the view that they should have been properly repaired if capable of being repaired and provided that any required replacement window/windows was/were appropriate. The council believes that this would have meant a 'like for like' replacement with single glazed windows in replica wooden frames. The council appreciates that double glazed windows have advantages over single glazed ones and would not have objected had the applicants sought to have secondary glazing fitted if the same could be installed in a way acceptable to the conservation officer.

The council is very concerned that granting retrospective consent would potentially set a dangerous precedent and would certainly do nothing to discourage others from undertaking works on a listed building/within the conservation area without the required consent.

The windows that have been fitted are inappropriate and should be removed. They are to the detriment of the listed building itself and to the conservation area more generally.
